

# Solarize Corvallis

## Help bring solar power to our community.

Solarize Corvallis is a grassroots initiative to put solar panels at as many buildings in our community as possible by the year 2025.

With your help, the Corvallis Sustainability Coalition and Oregon Clean Power Cooperative are working to add solar to our schools, low-income housing, government buildings and nonprofits. Let's accelerate our community's transition to renewable energy, and create a brighter future for all of us.

### Where Does Your Power Come From?

If you're a Pacific Power customer, more than half of the energy generating your electricity comes from burning coal.

50% COAL

### Let's Solarize Our Community

**100%**

of your contributions go to the project in a coordinated effort that makes the most of every penny.

**No CO<sub>2</sub>**

is produced when solar panels are generating power, reducing the fossil fuels that are changing our climate.

### Check it Out

Want all the facts? Visit [OregonCleanPower.Coop](http://OregonCleanPower.Coop) for details on current projects, and find out how to invest.

### Count on it

The Corvallis Sustainability Coalition has a long track record of good work. Every donation is guaranteed to make an impact.

### Rally Together

Small donations add up. Every contribution makes a difference. This initiative is a force with momentum.

**Solarizing creates a better future,** not just in ongoing savings, but in normalizing climate care for the next generation.

**Solarizing means living our values,** setting a tangible example of sustainability for children and for other communities.

**Solarizing is community resilience,** since solar batteries can provide our community with a backup power source in times of need.

### Invest
